	EPP: Eclipse Packaging Project					
1	Verify C/C++ EPP Package RC1					
1.1	Download EPP Package	Download, extract and start EPP package. Check the mailing list for the package: https://dev.eclipse.org/mailman/listinfo/epp-dev	EPP Package starts	Manual	To Do	
1.2	Version of Tracing Features	Go to Help -> About Eclipse IDE -> Installation Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng, CTF, GDBTrace)	Manual	To Do	
1.3	GDB Tracepoint Analysis presence	Open GDB Trace perspective	GDB Trace perspective opens	Manual	To Do	
1.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective opens	Manual	To Do	
1.5	OS Tracing presence	Open OS Tracing Overview perspective	OS Tracing Overview perspective opens	Manual	To Do	
1.6	TMF presence	Open Tracing perspective	Tracing perspective opens	Manual	To Do	
1.7	2022-12 Update Site (e.g.) Verify C/C++ EPP Package RC2	Go to Help -> Install New Software> Update site "2024-06 - https://download.eclipse. org/releases/2024-06/", Unselect "Hide items that are already installed"	Verify that all LTTng Kernel, LTTng UST and GDB Trace are available	Manual	To Do	
	, ,	Download, extract and start EPP package. Check the mailing list for the package:				
2.1	Download EPP Package	https://dev.eclipse.org/mailman/listinfo/epp-dev	EPP Package starts	Manual	Pass	
2.2	Version of Tracing Features	Go to Help -> About Eclipse IDE -> Installation Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng, CTF, GDBTrace)	Manual	Pass	
2.3	GDB Tracepoint Analysis presence	Open GDB Trace perspective	GDB Trace perspective opens	Manual	Pass	
2.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective opens	Manual	Pass	
2.5	OS Tracing presence	Open OS Tracing Overview perspective	OS Tracing Overview perspective opens	Manual	Pass	
2.6	TMF presence	Open Tracing perspective Go to Help -> Install New Software> Update site, select "2024-06 - https://download.eclipse.	Tracing perspective opens Verify that all LTTng Kernel, LTTng UST and	Manual	Pass	
2.7	2022-12 Update Site (e.g.)	org/releases/2024-06/", Unselect "Hide items that are already installed"	GDB Trace are available	Manual	Pass	
3	Verify Update Site					
		Download Eclipse for Committers and install LTTng Kernel, LTTng UST, GDBTrace and PCAP Network Analysis from main simrel testing Update site				
3.1	2024-12 Update Site (e.g.)	"2024-12 - http://download.eclipse.org/releases/2024-12/"	Verify that installation was successful	Manual	Pass	Tested with RC2
2.2		Download Eclipse for Committers and install LTTng Kernel, LTTng Control, LTTng UST, GDBTrace and PCAP Network Analysis from the Trace Compass Update site http://download.eclipse.		Manual	Desc	T. I. I. W. DOO
3.2	Trace Compass Update Site	org/tracecompass/2024-12/milestones/rc2 Download Eclipse for Committers from 2024-06 and install LTTng, LTTng Kernel, GDBTrace and	Verify that installation was successful	Manual	Pass	Tested with RC2
3.3	Upgrade using 2024-12 (e.g.) Update Site	PCAP Network Analysis from main simrel Update site. http://download.eclipse.org/releases/2024-09 Try to update the installation using the testing simrel update site. https://download.eclipse.org/releases/2024-12/	Verify that installation was successful	Manual	Pass	Tested with RC2
	Upgrade using Trace Compass Update Site	Download Eclipse for Committers from 2024-06 and install LTTng, LTTng Kernel, LTTng UST, GDBTrace and PCAP Network Analysis from the Trace Compass release Update site. https://download.eclipse.org/tracecompass/releases/10.1.0/repository. Try to update the installation using the Trace Compass update site http://download.eclipse.				
3.4		org/tracecompass/2024-12/milestones/rc2	Verify that installation was successful	Manual	Pass	Tested with RC2
3.5	Upgrade from previous EPP	Download Eclipse previous C/C++ EPP package (2024-06). Try to upgrade using both update sites: "https://download.eclipse.org/releases/2024-12" The information about the update sites to use is usually posted on epp-dev: https://dev.eclipse.org/mailman/listinfo/epp-dev	Verify that installation was successful	Manual	Pass	Must also select 'LTTng Tracer Control' to upgrade, white requires unchecking 'Group items by category'.
4	Verify Update Site	Release outside release train				
4.1	Trace Compass update site	Download Eclipse standard and install LTTng Kernel, LTTng Control, LTTng UST, GDBTrace and PCAP Network Analysis from main Update site: https://download.eclipse.org/tracecompass/stable/repository/ and https://download.eclipse.org/tracecompass/releases/10.2.0/repository/	Verify that installation was successful	Manual	Pass	
	Upgrade using Trace Compass update site	Download Eclipse standard and install LTTng Kernel, LTTng Control, LTTng UST, GDBTrace and PCAP Network Analysis from the Trace Compass update site: https://download.eclipse.org/tracecompass/stable/repository/ and https://download.eclipse.org/tracecompass/releases/10.2.0/repository/	Verify that installation was successful	Manual	Pass

		time. The selected event in the editor is updated. Then give	The Properties view is updated with the selected event's Property and				
6.5	External synchronization	focus back to the editor. Make sure the events table is clicked.	Value. Timestamp and Content are expandable.	Manual	Pass		

10.2.0-TraceCompassTestCases EventsEditor

7.1	Preparation	1) Download traces.zip (if necessary) and unzip into a local directory \${local} 2) Unzip traces/c_project_callsite.zip and traces/callsite.zip to your local disk. 3) Import demo C project to the Eclipse workspace of zip file c_project_callsite.zip 4) Import the test trace of zip file callsite.zip to a tracing project. 5) Select trace type "Generic CTF Trace" and open the trace. MAKE SURE THE FILES ARE IN THE SAME LOCATION	Zip file(s) available under https://drive.google.com/drive/folders/1DJ2FSYWi1u8HHfi2HwCtoAOKc	Manual	Pass		
7.2	Open call site	select event in table click right mouse button select "Open Source Code" menu item	Verify that correct source code file and line number is opened	Manual	Pass		
7.3	Open call site (no source code)	1) Close source code project 2) select event in table 3) click right mouse button 4) select "Open Source Code" menu item	Since the source code is not available no source code file is opened. Instead an error dialog is opened (with title "FileNotFoundException")	Manual	Pass		
8	Export to text						
8.1	Export CTF trace	1) Open a CTF trace (e.g. LTTng Kernel) 2) Click right mouse button 3) Select "Export To Text" menu item 4) Enter a file name and location 5) Press OK Progress bar is the eclipse one in the bottom.	Make sure that a progress monitor dialog is opened during the export. After finishing make sure that the text file exists and it contains the events stored in the file. Verify that the columns are printed as shown in the events table and that they are separated by tab character.	SWTBot	Pass		
8.2	Export Other Trace	1) Open a trace other than CTF trace 2) Click right mouse button 3) Select "Export To Text" menu item 4) Enter a file name and location 5) Press OK	Make sure that a progress monitor dialog is opened during the export. After finishing make sure that the text file exists and it contains the events stored in the file. Verify that the columns are printed as shown in the events table and that they are separated by tab character.	Manual	Pass	https://cdn.vector. com/cms/content/products/TA_Tool_Suite/Do cs/BTF_Specification.pdf	
8.3	Copy to clipboard	Open a CTF trace (e.g. LTTng Kernel) Click right mouse button Select "Copy to Clipboard" menu item Paste it in a text file	Verify that the columns are printed as shown in the events table and that they are separated by tab character.	SWTBot	Pass		
9	Swap Columns and Change Fonts	1) Open a trace					
9.1	Swap columns in events table	2) Drag a column	Covered by SWTBot tests	SWTBot	Pass		
8.2	Change fonts	Open the preferences select new font for trace types press apply verify that the font changed	Covered by SWTBot tests	SWTBot	Pass		
8.3	Reset fonts	Open the preferences Reset the font settings Press apply verify that the font changed	Covered by SWTBot tests	SWTBot	Pass

2	Project Creation						
2.1	New Project Wizard	Open New Tracing Project Wizard	Tracing Project Wizard opens	SWTBot	Pass		
	Create project	Specify a project name and finish	Tracing project appears in Project Explorer	SWTBot	Pass		
2.3	Project structure	Open the new Tracing project	Project contains Experiments and Traces	SWTBot	Pass		
3	Traces Folder						
	Preparation	1) Download traces.zip (if necessary) and unzip into a local directory \${local} 2) Import Custom Text and XML parsers (ExampleCustomXmlParser.xml, ExampleCustomTxMParser.xml) from directory traces/customParsers into your workspace from the Manage Custom Parsers dialog.		SWTBot	Pass		
3.1	Traces Folder menu	Select the Traces folder and open its context menu	Correct menu opens (Import, Refresh)	SWTBot	Pass		
	Trace Import Wizard	Select Import	Trace Import Wizard appears	SWTBot	Pass		
3.3	Import single custom text trace (link to workspace)	1) Browse to directory \${\}0cal}/traces/import/ 2) Select trace ExampleCustomTxt.log 3) Keep <auto detection="">, Select "Import unrecognized traces", unselect "Overwrite existing without warning" and select "Create Links to workspace" and 4) press Finish</auto>	Imported trace appear in Traces Folder and the Trace Type Tmf Generic is set. Make sure trace can be opened	SWTBot	Pass		
3.4	Import Single custom XML trace (link to workspace)	redo 3.1-3.3 but this time select ExampleCustomXml.xml	Imported trace appear in Traces Folder and the Trace Type "Custom XML log" is set. Make sure that trace can be opened	SWTBot	Pass		
3.5	Import LTTng Kernel CTF trace (link to workspace)	redo 3.1-3.3 but this time select directory kernel-overlap- testing/	Imported trace appear in Traces Folder and the Trace Type "LTTng Kernel" is set. Make sure that trace can be opened	SWTBot	Pass		
3.6	Rename + copy import	redo 3.3, 3.4, 3.5. However, Unselect "Create Links to workspace" When dialog box appear select Rename	Traces are imported with new name that has a suffix (2) at the end. Make sure that imported traces are copied to the project.	SWTBot	Pass		
	Overwrite + copy import	redo 3.3, 3.4, 3.5. However, Unselect "Create Links to workspace" When dialog box appear select Overwrite	Existing traces are deleted and new traces are imported. Make sure that imported traces are copied to the project and can be opened	SWTBot	Pass		
		redo 3.3, 3.4, 3.5. However, Unselect "Create Links to workspace"					
3.8	Skip	When dialog box appear select Skip	Make sure that no new trace is imported	SWTBot	Pass		
	Default overwrite	redo 3.3, 3.4, 3.5. However, Unselect "Create Links to workspace" and select "Overwrite existing without warning"	Make sure that no dialog box appears (for renaming, overwriting, skipping) and existing traces are overwritten). Make sure trace can be		Pass		
3.10	Import unrecognized	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${\}(\)(\)(\)(\)(\)(\)(\)(\)(\)(\)(\)(\)(\)(unrecognized.log is imported with trace type unknown. The default text file icon is displayed. The file, not trace, when opened, is displayed in the text editor.	SWTBot	Pass		
	, , , , ,	redo 3.10, however unselect "Import unrecognized traces"		2			
3.11	Import unrecognized (ignore)	1000 0.10, nowever unserect import unrecognized traces	unrecognized.log is not imported	SWTBot	Pass		
	, (igiioio)	Delete all traces in project - Right mouse click on Traces					
	Preparation	folder and select "Clear"		SWTBot	Pass		
3.12	Import CTF trace by selection metadata file only	Redo 3.5, However only select metadata file instead of directory trace	Imported trace appear in Traces Folder and the Trace Type "LTTng Kernel" is set. Make sure that trace can be opened	SWTBot	Pass		
	Preparation	Delete all traces in project					

3.13	Recursive import with auto- detection (Rename All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import 3) select directory import 4) Keep <auto detection="">, Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename All"</auto>	All Traces are imported with respective trace type set. Traces with name clashes are imported with suffix (2). 1 trace (unrecognized. log) is imported with trace type unknown. Make sure that traces can be opened which have a trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3.14	Recursive import with auto- detection (Overwrite All)	"Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Overwrite All"	All Traces are imported with respective trace type set. Traces with name clashes are overwritten. I trace (unrecognized.log) is imported with trace type unknown. Make sure that traces can be opened which have a trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3 15	Recursive import with auto-detection (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \$[local]/traces/import/ 3) select directory import 4) Keep <auto detection="">, Select "Import unrecognized traces", unselect "Overwrite existing without warning" and select "Create Links to workspace" and uncheck "preserve folder structure" 5) press Finish 6) When dialog appears select Skip All"</auto>	All Traces are imported with respective trace type set. Traces with name clashes are not imported. 1 trace (unrecognized.log) is imported with trace type unknown. The unknown trace type should open with the text editor.	SWTBot	Pass	
3.13	Preparation	Delete all traces in project	editor.	SWIDUL	r doo	
3.16	Recursive import with auto- detection (test rename, overwrite and skip)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Keep <auto detection="">, Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename" 7) When dialog appears select "Overwrite" 8) When dialog appears select "Skip"</auto>	All Traces are imported with respective trace type set. Traces with name clashes are either renamed, overwritten or skipped as per dialog action. Make sure that traces can be opened which have trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3.17	Recursive import with specific trace type 1 (Skip All) Preparation	1) Open Import wizard 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Generic CTF Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" and 5) press Finish 6) When dialog appears select Skip All" Delete all traces in project	After selecting trace type, verify that button "Import unrecognized traces" is disabled. 4 CTF traces are imported with trace type "Generic CTF Trace". Make sure that these traces can be opened	SWTBot	Pass	
3.18	Recursive import with specific trace type 2 (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "LTTng Kernel Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Skip All"	After selecting trace type, verify that button "Import unrecognized traces" is disabled. One LTTng Kernel trace is imported with trace type "LTTng Kernel Trace". Make sure that this trace can be opened.	SWTBot	Pass	
3.19	Preparation Recursive import with specific trace type 3 (Skip All) Preparation	Delete all traces in project 1) Open Import wizard 2) Browse to directory \${\colon{1}{c}}\$ (aca)/traces/import/ 3) select directory import 4) Select trace type "LTTng UST Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Skip All" Delete all traces in project	After selecting trace type, verify that button "Import unrecognized traces" is disabled. 3 LTTng UST traces are imported with trace type "LTTng UST Trace". Make sure that these traces can be opened.	SWTBot	Pass	
	i repuration	Delete un nuces in project				

3.20	Recursive import with specific trace type 4 (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \$[local]/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finlish 6) When dialog appears select Skip All"	All text files in directories are imported as trace and trace type "Tmf Generic" is set. Note that trace type validation only checks for file exists and that file is not a directory. Make sure that these traces can be opened. However traces with wrong trace type won't show any events in the table.	SWTBot	Pass
0.20			uio tabio.	0111.001	
3.21	Preparation Import wizard from workbench menu with project selected	Delete all traces in project 1) Select project "Test" in Project Explorer view 2) Open import wizard from menu File > Import > Tracing >	Verify that trace is imported to "Test" project and can be opened.	SWTBot	Pass
3.22	Import wizard from workbench menu with no project selected	Clear selection in Project Explorer view Open import wizard from menu File > Import > Tracing >	Verify that trace is imported to default "Tracing" project and can be opened.	SWTBot	Pass
	Preparation	Delete all traces in project			
3.23	Drag and Drop from other Tracing project	D&D a few LTTng traces from another Tracing project's Traces folder	Selected traces are added to Traces folder with proper icon. Trace can be opened.	Manual	Pass https://bugs.eclipse.org/bugs/show_bug.cgi?id=576612 Dropping a folder linking to existing kernel trace one from generic project.
3.24	Drag and Drop from non-Tracing project	D&D a few files from a non-Tracing project, if a CTF trace, will need to drag the entire folder	Selected traces are added to the Traces folder with default icon. Files can be opened with the default editor.	Manual	When if a studen inting it desisting farmer lated on the ruling self-eit, project. When dragging under Tracing project root, icons look like defaults. When dragging under Traces folder, icons and Views become standard tracing ones.
3.25	Drag and Drop from external	D&D a few files from an external file manager	Selected traces are added to the Traces folder with default icon. For actual traces, Trace type is detected automatically. Trace can be opened. For non traces the files are added with default icon and they can be opened with the default editor.	Manual	Pass. Similar to above.
0.20	Drag and Drop of trace with	D&D a trace with name of an existing trace into traces folder	Verify that trace is added into the traces folder with the trace name of the original trace plus a	manaai	Similar to doore.
3.26	existing name	2) Confirm the renaming of traces	suffix (2) Verify that trace is added into the traces folder	Manual	Pass
3.27	Drag and Drop of trace with existing name (2nd time)	Redo test 3.26 with the same trace and same destination folder	with the trace name of the original trace plus a suffix (3)	Manual	Pass
3.28	Import destination	Open Import wizard	Verify "Into Folder" box cannot be updated	Manual	Pass Sehr: Not sure which import method this is using, it passes for Trace Import, but not other file imports
	Preparation	Delete all traces in project 1) Open Import wizard (see 3.1-3.2)			
3.29	Recursive import with preserved folder structure	2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish	All Traces are imported with respective trace type set. The folder "clashes" is imported with its traces inside. Make sure that traces can be opened which have a trace type set.	SWTBot	Pass
	Recursive import with preserved	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish	The wizard should finish quickly as no trace will be imported. Make sure that traces can be		
3.30	folder structure (Skip All)	When dialog appears select "Skip All"	opened which have a trace type set.	SWTBot	Pass
3.31	Recursive import with preserved folder structure (Rename All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename All"	All Traces are imported with respective trace type set with suffix (2). The folder "clashes" is traces inside. Make sure that traces can be opened which have a trace type set.	SWTBot	Pass
3.32	Preparation Delete with mixed selection of traces and folders	Delete all traces in project 1) Create two trace folders under the "Traces" folder 2) Import 2 traces under each folder 3) Open all 4 traces 4) Select one trace in the first folder and the second folder in the Project Explorer view 5) Right-Glick, Delete. Click Yes.	A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of the 3 deleted traces should be closed automatically with one remaining editor opened.	SWTBot	Pass
3.33	Delete multiple folders	Create 2 trace folders under the "Traces" folder Import a trace under each folder Open both traces Select both folders in the Project Explorer view Right-click, Delete. Click Yes	A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of both traces should be closed automatically.	SWTBot	Pass e
3.34	Clear single Traces folder	Import 2 traces from different folders preserving folder structure Open both traces. Select the Traces folder Right-click, Clear. Click Yes. 15	Time Offsetting						
	Preparation	Open Project Explorer view and Properties view. Create an empty tracing project. Import two different traces to the project. Open the traces and note their start time. Close the traces.		Manual	Pass		
15.2	Apply time offset dialog - trace selection	Select both trace elements in the Project Explorer view. Right-click and select Apply Time Offset	The Apply time offset dialog opens in Basic mode. The Trace name show both traces and the Offset in seconds is blank.	SWTBot	Pass		
15.3	Apply time offset dialog - folder selection	Select the Traces folder element in the Project Explorer view. Right-click and select Apply Time Offset	The Apply time offset dialog opens in Basic mode. The Trace name show both traces and the Offset in seconds is blank.	SWTBot	Pass		
15.4	Apply time offset dialog - experiment selection	Create an experiment with both traces. Select the experiment element in the Project Explorer view. Right-click and select Apply Time Offset	The Apply time offset dialog opens in Basic mode. The Trace name show both traces and the Offset in seconds is blank.	SWTBot	Pass		
15.5	Apply time offset dialog - Basic mode	Select a trace element in the Project Explorer view. Right- click and select Apply Time Offset In the Offset in seconds column, enter a time with seconds and decimals. Click OK. Open the trace.	The timestamps in the trace are all offset by the entered value. The Properties view shows the 'time offset' with the entered value.	SWTBot	Pass		
15.6	Apply time offset dialog - cumulative offset	Select the same trace element in the Project Explorer view. Right-click and select Apply Time Offset In the Offset in seconds column, enter a time with seconds and decimals. Click OK. Open the trace.	The timestamps in the trace are all offset by the cumulative sum of the previous and current entered value. The Properties view shows the 'time offset' with the cumulative value.	SWTBot	Pass		
15.7	Clear time offset	Select the trace element in the Project Explorer view. Right- click and select Clear time offset. Click OK to confirm. Open the trace.	The timestamps in the trace are back to their original values. The Properties view shows the 'time offset' as blank.	SWTBot	Pass		
15.8	Apply time offset dialog - Advanced mode	Open one trace and close the other trace. Select both trace elements in the Project Explorer view. Right-click and select Apply Time Offset Choose the Advanced radio button.	The Apply time offset dialog opens and is switched to Advanced mode. The Trace name shows both traces and the Offset in seconds is blank. The Reference time for the opened trace is set to its start time.	Manual	Pass		Automation Candidate
	Apply time offset dialog - Advanced mode - compute from selection	Double-click the second trace to open it. Select an event in its	Both traces are open. Selecting an event updates the Reference time for the selected trace, and updates the Target time for all traces. Pressing the button computes the Offset in seconds as the difference between Target time and Reference time for that row. The trace which has a computed offset is closed when the OK button is pressed. After reopening, the two previously selected events	Manual	Pass		Automation Candidate
15.10	Apply time offset dialog - Advanced mode - compute from entered values	Select the first trace element in the Project Explorer view. Right-click and select Apply Time Offset Choose the Advanced radio button. Double-click the trace name to open it. Select the Reference time cell and copy the start time. Select the Target time and paste the value. Edit both values to different times. Click the button in the trace row. Click OK. Open the trace.	The trace is opened. The Reference time is set to the trace start time. The Reference time and Target time can be copied, pasted, and edited. Pressing the button computes the Offset based on the current time values. The trace is closed with the OK button is pressed. After reopening, the timestamps in the trace are offset according to the computed value. The Properties view shows the 'time offset' with the computed value.	Manual	Pass		
15.11	Clear time offset with opened traces	Open both traces. Select both trace elements in the Project Explorer view. Right-click and select Clear time offset. Click OK to confirm. Open the traces.	The opened traces are closed when the OK button is pressed. After reopening, the timestamps in the traces are back to their original values. The Properties view shows the 'time offset' as blank.	Manual	Pass

	TMF - Sequence Diagram	37	0	22		2	
Target:	Ubuntu 20.04.5 LTS 64-bit		·				
Step	Test Case	Action	Verification	Type		Comment	
1	Preparation						
		1) Download traces.zip (if necessary) and unzip into a local directory \${local} / 2) Use traces simple-server-thread1 and simple-server-thread2 under traces/import/ for test cases below				Note: UI tests are not SWTBot, but JUnit tests. Tests are triggered programmatically right below the dialogs level	
			LTTng Kernel perspective opens with correct views:			,g,g	
			Project Explorer, Control, Control Flow, Resources,	014770 /			
1.1	Open perspective	Open and reset LTTng Kernel perspective	Statistics, Histogram, Properties, Bookmarks	SWTBot	Pass		
1.2	Open TMF Sequence Diagram View	Use menu Window → Show View → Other → Tracing → Sequence Diagram	Verify that 'Sequence Diagram' view is shown	SWTBot	Pass		
		1) Create Tracing Project 2) Create Experiment (SeqExp) 3) Import 2 traces simple-server-thread1 and simple-server-thread2 4) Add these 2 traces to experiment 6) Open (double-click on) the experiment	Verify that sequence diagram was loaded. The interaction show the signal numbers (Note that trace doesn't contain strings for the interactions. A special parser would be necessary to map signal number to trace)	Manual	Pass		
2	Managa View						
2 2.1	Manage View Close view	Close Sequence Diagram view	Sequence Diagram View is removed from perspective	Manual	Pass		
2	Open view when	Close 'Sequence Diagram' View Sequence Diagram' View	Verify that sequence diagram was loaded. Verify that	Manaai	1 455		
2.2	experiment/traces is already loaded	load sequence diagram experiment Open Sequence Diagram view	all 17 pages are loaded. The hamburger menu should help.	Manual	Pass		
_							
	Tooltip Hover over interaction	Goto to first page (no selection of any interaction or lifeline) 2) Hover over first interaction (arrow or number)	Verify that tooltip appears with content with interaction name and time stamp (10000 14:58:00.740995147). Tooltip is following the OS theme.	UITest	Pass		
3.2	Hover over interaction after selection	1) Goto to first page 2) select first interaction 3) Hover over 3rd interaction	Verify that tooltip appears with content with interaction names and time stamp delta between selected interaction and interaction that was hovered over (10001 — 10000 delta: 000.000 157 023)	UITest	Pass		
3.3	Hover over time compression bar	Hover over first element in time compression bar on the left of the view	Verify that tooltip appears with delta and graph to show where delta is in relation to current configured min max values. (delta: 000.000 3 480)	UITest	Pass		
4	View Synchronization						
	Selection of interaction	Select an interaction in the 'Sequence Diagram'	Verify that interaction is highlighted in 'Sequence Diagram' view. Verify that in the events table the corresponding event is selected. Verify that time stamps matches	UITest	Pass		
4.2	Selection of event in events table	Select an sequence diagram event in the events table (type SEND or RECEIVE)	Verify that corresponding interaction is selected in the 'Sequence Diagram' view	UlTest	Pass		
		Change time range in 'Histogram View'.	Verify that the content of the 'Sequence diagram' changes and the interactions are part of the new window range	UlTest	Pass		
5	View Actions						
	Test page navigation	Use buttons and menu items 'Go to next page', 'Go to previous page', 'Go to last page' and 'Go to first page' to navigate through trace. Use also menu item 'Pages' to jump to specific page	Verify that different time ranges are selected when changing page by looking at Histogram View. Histogram View window will show the start of the page. Note that there are 10000 interactions per page. In this traces there are in total 160032 interactions. Verify that last page has 32 interactions between 2 lifelines.	SWTBot	Pass		
5.2	Test menu item 'Pages'	1) Select menu item 'Pages' 2) In text box type "9" 3) Click on 'OK'	Verify that a dialog box will show. Verify that for this trace it shows 'Total: 17 pages is shown" and the current page is displayed in the text box. After step 3) verify that page where changed to page 9. For this trace page 9 is the page with 3 lifelines.	SWTBot	Pass		

10.2.0-TraceCompassTestCases SequenceDiagram

5.3	Find of interaction	Goto to page 1 → 1) Use button and menu item "Find" 2) select Interactions and deselect lifeline 3) type regular expression 10.*00 4) press find 5) press find 6) press find 7) press find 8) press find	After 4) verify that interaction 10000 (player1 → master) is selected. After 5) verify that interaction 10100 (master → player1) is selected. After 6) verify that 10000 (player2 → master) is selected. After 7) verify that interaction 10100 (master → player2). After 8 nothing else will be found	SWTBot	Pass		
5.4	Find of lifeline	Goto to page 1 → 1) Use button and menu item "Find" 2) select lifeline and deselect interaction 3) type player2 4) press find 5) press find	After 4) verify that lifeline with name player2 is selected (page 9 with 3 lifelines). After 5) player2 is selected on page 10	SWTBot	Pass		
5.5	Find criteria persistence	Restart eclipse open find dialog	Verify that previous used find criteria are still in the list.	Manual	Pass		
5.6	Find short-cut	Select 'Sequence Diagram' view press CTRL+f	Verify that find dialog opens	Manual	Pass	https://bugs.eclipse.org/bugs/show_bug.cgi?id=581104 Sehr: This bug is still relevant	
5.7	Filter of interactions	Goto to page 1 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Interactions and deselect Lifeline 3.2) type regular expression 10.*03 4) Press 'Create' 5) Press 'Ok'	After 5) verify that Interactions with name 10003 and 10103 are not shown	SWTBot	Pass	·	
5.8	Filter of lifelines	Goto to page 9 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Lifelines and deselect Interactions 3.2) type regular player2 4) Press 'Create' 5) Press 'Ok'	After 5) verify that player2 is not shown	SWTBot	Pass		
	Deselect filter	1) Apply one filter 2) Use menu item 'Hide Patterns' 3) deselect filter 4) click 'Ok'	Verify that all lifelines and interactions are shown	SWTBot	Pass		
5.10	Filter criteria persistence	Restart eclipse open hide dialog	Verify that previous used hide criteria are still in the list	SWTBot	Pass		
	Zoom-in	Use button and menu item for zoom-in to activate zooming in click into sequence diagram view	Verify that 'Sequence Diagram' view zooms in. Note that no selection is possible.	SWTBot	Pass		
5.12	Selection after zooming	Click on button and menu item 'Select' to go back to selection mode select an interaction	Verify that selection is possible.	SWTBot	Pass		
5.13	Zoom-out	Use button and menu item for zoom-out to activate zooming out click into sequence diagram view	Verify that 'Sequence Diagram' view zoom out. Note that no selection is possible.	SWTBot	Pass		
5.14	Reset zoom	1) Use button and menu item for 'Reset zoom factor' to reset the zoom level	Verify that 'Sequence Diagram' view goes back to default zoom	SWTBot	Pass		
5.15	Configure min/max	Select menu item 'Configure Min Max' Change min to 100 and max to 2000 (keep scale and precision) press 'Ok'	After 1) verify that a dialog box shows with default values. After 3) verify that time compression bar changes some colors. It will show more deeper red because the max value is lower.	SWTBot	Pass		
	Configure min/max (default)	After changing min and max 1) select menu 'Configure Min Max' 2) press 'Default' 3) press 'Ok'	After step 2) the default values are shown. After step 3) the time compression bar will change colors. Note that the default values are computed based on all deltas of 2 consecutive interactions.	SWTBot	Pass		
5.17	Show node end	Goto to page 1 → 1) Resize view so that the arrow (pointer) of the interaction is not shown 2) select on interaction 3) Use menu item Navigation → Show node end	Verify that end lifeline of the interaction (the arrow) is shown if it fits the screen	Manual	Pass		

10.2.0-TraceCompassTestCases SequenceDiagram

5.18	Show node start	Goto to page 1 → 1) Resize view so that the beginning of the interactions are not shown 2) select on interaction 3) Use menu item Navigation → Show node start	Verify that start lifeline of the interaction is shown	Manual	Pass	
5.19	Show node end short-cut	Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Press SHIFT+ALT+END	Verify that end lifeline of the interaction (the arrow) is shown	Manual	Pass	
5.20	Show node start short-cut	Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Press SHIFT+ALT+HOME	Verify that start lifeline of the interaction is shown	Manual	Pass	
5.21	Scroll down short cut	Press SHIFT+ALT+ARROW DOWN	Verify that within a page the display scrolls down per view size	Manual	Pass	
5.22	Scroll up short cut	Press SHIFT+ALT+ARROW UP	Verify that within a page the display scrolls up per view size	Manual	Pass	
5.23	Overview feature	Goto page 9 → Keep pressing + icon at the lowest right corner of the view and drag down, up, left or right	Verify that it's possible to navigate through a page of the sequence diagram view May be hard to see.	Manual	Pass	GTK 3 problem ?
5.04	Dist	Select 'Sequence Diagram' view and press printer icon in the Eclipse's tool bar (or use CTRL+P). Select one		Manage	Deve	
5.24	Print Remove filter (Bug 391714)	pager page to print 1) Create 1 filter ("Hide Patterns") if necessary (see 5.8) 2) Open Error Log view if necessary 3) Open filter dialog box and remove all filters 4) Press 'Ok' 5) Open filter dialog box again	Verify that it is possible to print Verify that no exceptions occurred and after 5) no filters are listed	Manual Manual	Pass	Pass on 16.04 and 16.10 could it be cups giving you a hard time?
	Time Sync. without	Open trace without any sequence diagram information Open SD view if necessary Open Error Log view if necessary change time range in Histogram view Change time current selected time in Histogram				
5.27	interactions (Bug 391716)	View	Make sure that no exceptions occurred	Manual	Pass

1.2	Open TMF Statistics View	When running the Trace Compass RCP: Use menu Window \rightarrow Show View \rightarrow Tracing \rightarrow Statistics When running Trace Compass installed in Eclipse: Use menu Window \rightarrow Show View \rightarrow Other \rightarrow Tracing \rightarrow Statistics	Verify that 'Statistics' view is shown	SWTBot	Pass	
1.3	Open experiment	1) Create Tracing Project 2) Create Experiment (SeqExp) 3) Import 2 traces simple-server-thread1 and simple-server-thread2 4) Select trace type "Generic CTF Trace" 5) Add these 2 traces to experiment	Verify that statistics are shown per trace and per event type. Each trace has 80021 events. Verify that event types ENTER/RETURN/SEND/RECE IVE/INFO/after_fork_child are counted.	RCPTT	Pass	
2	Manage View	01 11 101 11 11 11	Otatiatian Indonesia and an address	DODIT		
2.1	Delete view	Close the 'Statistics' View	Statistics' view is removed from Statistics' view View is	RCPTT	Pass	
2.2	Open view	Use menu Window → Show View → Tracing → Statistics	displayed and re-populated	RCPTT	Pass	
2.3	Open view when experiment/trace is already loaded	Close 'Statistics View' 2) load trace above trace 3) Open 'Statistics' view	Verify that statistics are shown per trace and per event type. Each trace has 80021 events.	RCPTT	Pass	
2.0	anouay loadou	Cidibilities View		110111	, doo	
3	Other					
3.1	Build of statistic index	Open trace	Verify that 'Statistics' view is populated gradually during indexation	Manual	Pass	
3.2	Persistence of statistics	Open same trace multiple times after indexing of trace was finished the first time	Verify that when opening the trace the x-times (x > 1), that the statistics appear right away	Manual	Pass	
4	Range Synchronization					
4.1	External synchronization (full)	In any other view that supports range synchronization, select the full range of the trace.	Events in 'Events in selection' is updated and equals 'Events total' values	Manual	Pass	Automation Candidate
4.2	External synchronization (range)	In any other view that supports range synchronization, select a new range.	Events in 'Events in selection' is updated according to new range	Manual	Pass	Automation Candidate

10.2.0-TraceCompassTestCases StatisticsView

5	Multiple Trace Synchronization					
	Preparation	1) Download traces.zip (if necessary) and unzip into a local directory \${local} 2) Import kernel trace \${local}/traces/import/kernel-overlaptesting 3) Import UST \${local}/traces/import/trace ust-overlaptesting 4) Create experiment with trace of 2) in it				
5.1	Open multiple traces (no overlap)	Open multiple traces that don't overlap in time	View shows the last opened trace	Manual	Pass	Automation Candidate
5.2	Change selected time and range (no overlap)	In any other view that supports range synchronization, select a new range	Events in 'Events in selection' is updated according to new	Manual	Pass	Automation Candidate
5.3	Select other trace (no overlap)	Select different trace by clicking its Events editor tab	View is updated to show selected trace. 'Events in selection' is updated according	Manual	Pass	Automation Candidate
5.4	Open multiple traces (overlap)	- Open multiple traces that overlap in time - For both traces, in Events table right mouse-click -> "Follow time updates from other traces"	View shows the last opened trace	Manual	Pass	Automation Candidate
5.5	Change selected time and range (overlap)	In any other view that supports range synchronization, select a new range	Events in selection' is updated according to new range	Manual	Pass	Automation Candidate
5.7	Select other trace (overlap)	Select different trace by clicking its Events editor tab	View is updated to show selected trace. 'Events in	Manual	Pass	Automation Candidate
5.8	Close all traces	Close all Events editor tabs	View is cleared.	SWTBot	Pass

10.2.0-TraceCompassTestCases CustomParsers

	Section	Pass	Fail	Automated	To Do	Comments	
	TMF - Custom Parsers	28	0	12	0	0	
Target:	Windows						
Step	Test Case	Action	Verification	Туре		Comment	
0	Prerequisites	le the terms of the the terms					
0.1	Get custom parser definition and logs	In the trace compass git, get the traces located in org.eclipse. tracecompass/tmf/org.eclipse. tracecompass.tmf.core.tests/testfiles/xml get the definitions (testDefinition.xml) and the valid traces in the valid subdirectory.	traces.zip is located in this folder https://drive.google.com/drive/folders/1DJ2FSYWi1u8HI	Hfi2HwCtoAOKo	CpZMDr8?u	usp=sharing	
1	View management						
1.1	Open perspective	Open and reset Tracing perspective, and open Time Chart view	Time Chart view opens.	SWTBot	Pass		
1.2	Import custom parser definitions	Create a tracing project, open Manage Custom Parsers dialog and import text	Custom parsers imported (TmfGeneric, Custom XML Log)	RCPTT	Pass		
1.3	Import custom traces	Create a tracing project and import a text and XML custom trace	Traces imported in Traces folder of project (ExampleCustomTxt.log, ExampleCustomXml.xml) and have their trace type auto-selected.	RCPTT	Pass		
1.3	import custom traces	and AME custom trace	type auto-selecteu.	KCFTT	Газз		
2	Custom parser management						
2.1	Open Manage Custom Parsers dialog	Open Manage Custom Parsers dialog in Traces folder context menu	Dialog opens.	SWTBot	Pass		
2.2	New (text)	Select "Text" radio button, click New button, enter Trace type, change stuff, click Next, click Finish	Custom parser appears in list.	SWTBot	Pass		
2.3	Edit (text)	Select custom parser, click Edit, change stuff, click Next, click Finish		SWTBot	Pass		
2.4	Export (text)	Select custom parser, click Export, enter name, click Save	Exported custom parser stored in file system.	RCPTT	Pass		
2.5	Delete (text)	Select custom parser, click Delete	Custom parser is deleted.	SWTBot	Pass		
2.6	Import (text)	Click Import, find custom parser definition, click Open	Imported custom parser appears in list.	RCPTT	Pass		
2.7	New (XML)	Select "XML" radio button, click New button, enter Log Type, write an xml log in the input, <a>c>1 <c>1<c>2<c>2+b><c>2+b><c>2 c>d>1 d> set to log entry, set c to timestamp logged and d to message logged, set timestamp format to ss in both text boxes, click Next, click Finish</c></c></c></c></c>	Custom parser appears in list.	Manual	Pass		Automation Candidate
2.8	Edit (XML)	Select custom parser, click Edit, change stuff, click Next, click Finish	Previously entered data appears, can be edited.	Manual	Pass		Automation Candidate
2.9	Export (XML)	Select custom parser, click Export, enter name, click Save	Exported custom parser stored in file system.	Manual	Pass		Automation Candidate

10.2.0-TraceCompassTestCases CustomParsers

2.10	Delete (XML)	Select custom parser, click Delete	Custom parser is deleted.	SWTBot	Pass	
2.11	Import (XML)	Click Import, find custom parser definition, click Open	Imported custom parser appears in list.	Manual	Pass	Automation Candidate
3	Custom parser trace handling					
3.1	Select trace type (text)	Select test file in Traces folder, right-click, select "Select Trace Type > Custom Text > (parser name)"	Trace type is assigned (re-open Select Trace Type sub-menu to verify)	RCPTT	Pass	
3.2	Open trace (text)	Double-click on test file in Traces folder	Editor opens with events table, Time Chart view is populated.	Manual	Pass	
3.3	Raw view (text)	Right-click in editor, click Show Raw	Editor is split with raw view on right pane.	Manual	Pass	
3.4	Time synchronization (text)	Click in Time Chart view, select event in editor table, select event in raw view	All three widgets synchronize to selected time.	Manual	Pass	
3.5	Select trace type (XML)	Select test file in Traces folder, right-click, select "Select Trace Type > Custom XML > (parser name)"	Trace type is assigned (re-open Select Trace Type sub-menu to verify)	RCPTT	Pass	
3.6	Open trace (XML)	Double-click on test file in Traces folder	Editor opens with events table, Time Chart view is populated.	Manual	Pass	
3.7	Raw view (XML)	Right-click in editor, click Show Raw	Editor is split with raw view on right pane.	Manual	Pass	
3.8	Time synchronization (XML)	Click in Time Chart view, select event in editor table, select event in raw view	All three widgets synchronize to selected time.	Manual	Pass	
4	Raw viewer					
4.1	Show Raw Viewer	Open Custom text trace Right-click in table and select "Show Raw"	Raw viewer is shown beside the events table	Manual	Pass	
4.2	Hide Table	Right-click in table and select "Hide Table"	Events table is hidden and only raw viewer is shown	Manual	Pass	
4.3	Show Table	Right-click in raw viewer and select "Show Table"	Events table is shown beside raw viewer	Manual	Pass	
4.4	Select Event (Bug 457852)	Select event in raw viewer	Correct event is select in table, timestamp is propagated to other TMF views and Properties view shows content of selected event	Manual	Pass	
4.5	Select Event using arrow keys (457852)	select event in raw viewer with mouse use arrow key down and up several times	Correct event is select in table, timestamp is propagated to other TMF views and Properties view shows content of selected event	Manual	Pass	
4.6	Hide Raw viewer	Right-click in table and select "Hide Raw"	Raw viewer is hidden and only events table is shown	Manual	Pass	

10.2.0-TraceCompassTestCases StateSystemExplorer

	Section	Pass	Fail	Automated	To Do	Comments	
	TMF - State System Explorer	12	0	6		0	
Target:	Windows						
Step	Test Case	Action	Verification	Type		Comment	Test that will make this swtbot
1	Preparation						
1.1	Open TMF State System Explorer View	Use menu Window → Show View → Tracing → State System Explorer	Verify that 'State System Explorer' view is shown	SWTBot	Pass		84711
2	Manage View						
2.1	Delete view	Close the State System Explorer' View	'State System Explorer' view is removed from perspective	SWTBot	Pass		84711
2.2	Open view	Use menu Window → Show View → Tracing → State System Explorer	'State System Explorer' view is displayed and re- populated	SWTBot	Pass		84711
2.3	Open Trace	Open an LTTng Kernel Trace	Verify that view is populated with kernel state system (o.e.t.analysis.os.linux.kernel) and statistics state systems (o.e.l.tmf.statistics.*) of opened trace	SWTBot	Pass		84711
2.4	Open view when trace is already loaded	Close State System Explorer View Load LTTng trace Open 'State System Explorer' view	Verify that view is populated with state systems from trace	SWTBot	Pass		84711
2.5	Open Experiment	Open Experiment with 2 or more LTTng traces	Verify that view is populated with all kernel state system and statistics state systems of opened experiment (separated by trace)	RCPTT	Pass		
2.7	Select other trace	Select different trace by clicking its Events editor tab	View is updated to show selected trace. State values, start time and end time are updated according to the selected trace's previously selected range.	Manual	Pass		Automation Candidate
2.6	Restart	Restart Eclipse	Verify that view is populated with state systems from trace	Manual	Pass		
2.7	Close all traces	Close traces and experiment one by one from the editor tab	Verify that state system explorer view is cleared after closing the last trace	Manual	Pass	ī	Automation Candidate
3	Timestamp / Time Range Selection	Select time in another view (e.g Histogram					
3.1	Select timestamp	view) that supports time synchronization	Verify that selection time is updated in view	Manual	Pass		It's an abstract time graph view
•		Select a time range in another view that	Tany and Solodier and to apartica in view				about time graph view
3.2	Select time range	supports time synchronization	Verify that selection time range is updated in view	Manual	Pass		It's an abstract time graph view
4	Displaying of Changed Values						
4.1	Highlighting of changed values	Select many different timestamps one after the other	Selection time bar is over the current time and state value of Attribute is shown	Manual	Pass		Automation Candidate

Step	Test Case	Action	Verification	Type		Comment	
<u>0</u>	Download the test resources	Download this					
1	Preparation						
1.1	Open TMF Flame Chart View	Use menu Window \rightarrow Show View \rightarrow Other \rightarrow Tracing \rightarrow Flame Chart	Verify that 'Flame Chart' view is shown	SWTBot	Pass		
1.2	Import generic trace	Import a trace that does not have any call stack information, like a standard kernel trace	Verify that nothing is shown in the view, except "Stack info not available (<tracename>)"</tracename>	Manual	Pass		Automation Candida
1.3	Import cyg-profile trace	Import the trace in the "trace" directory of the downloaded zip	Verify that the Flame Chart View is populated with some callstack information.	SWTBot	Pass		
1.4	Import cyg-profile-fast trace	Import a trace in the "trace-fast" directory of the downloaded zip	Verify that the Flame Chart View is populated with some callstack information.	SWTBot	Pass		
2	Managa View						
2	Manage View	Class the Flame Chart View	Elama Chart' view is removed from paranesting	Monuel	Desc		A
2.1	Close view	Close the Flame Chart View Use menu Window → Show View → Other	Flame Chart' view is removed from perspective	Manual	Pass		Automation Candidat
2.2	Open view	→ Tracing → Flame Chart	Flame Chart' view is displayed and re-populated	SWTBot	Pass		
2.3	Open Trace	Open "trace(-fast)" trace	Verify that view is populated with call stack information	SWTBot	Pass		
2.4	Open view when trace is already loaded	1) Close 'Flame Chart' view 2) Open "glxgears-cyg-profile(-fast)" trace located in the git in ctf test 3) Open 'Flame Chart' view	Verify that view is populated with call stack information	SWTBot	Pass		
2.5	Open Experiment	Open Experiment with 2 or more Flame Chart traces. (You can use both traces)	Verify that view is populated with all call stack information (separated by trace).	Manual	Pass		Automation Candidat
0.7	Calaat atlaan turaa	Select different trace by clicking its Events	View is wednesd to allow a least of trace	Manual	Desa		
2.7	Select other trace	editor tab	View is updated to show selected trace. Verify that view is populated with call stack from	Manual	Pass		Automation Candidat
2.6	Restart	Restart Eclipse with Flame Chart trace opened	trace	Manual	Pass		Automation Candidat
2.7	Close all traces	Close traces and experiment one by one from the editor tab	Verify that Flame Chart view is cleared after closing the last trace	Manual	Pass		Automation Candida
3	Navigation						
3.1	Select time	Click on random time in the time graph pane	Selected time line is updated. Table is updated to show the full stack information at the selected time. Selected time is updated in other views.	SWTBot	Pass		
3.2	Select Previous/Next Event	Click Previous/Next Event button	Previous or next call stack change is selected and corresponding active function and stack depth is selected. Table is updated to show the full stack information at the selected time.	SWTBot	Pass		
	Zoom to function (table)	Double-click on a function in the table pane	Time range is updated to the full duration of the	SWTBot	Pass		
3.4	Zoom to function (time graph)	· · · · · · · · · · · · · · · · · · ·	Time range is updated to the full duration of the	SWTBot	Pass		
3.5	Go to first event in trace	Go to events editor, press home	the Flame Chart view is updated	Manual	Pass		Automation Candidat

12/9/2024

10.2.0-TraceCompassTestCases FlameChartView

4.1	Time synchronization	Select a random time in another view	Selected time line is updated. Table is updated to show the full stack information at the selected time. If selected time is outside current range,	SWTBot	Pass	
4.2	Event synchronization	Select a call stack-impacting event (function entry/exit) in events table	In addition to updating the selected time, the active function at the event time is selected.	SWTBot	Pass	
4.3	Time range synchronization	Select a new time range in Histogram view.	Time range is updated.	SWTBot	Pass	
5	Function name import - Text fi	ile				
5.1	Invalid text file import	Open 'trace' from Fibonacci.zip. Click the "Configure" button in the view and click "Browse" to select a random .txt file that does not contain any debugging info.	The function addresses do not change. Says "the following file(s) are invalid"	Manual	Pass	Automation Candidate
5.2	Valid text file import	Import a file "fibonacci.symbols"	The view now displays function names instead of function addresses (both in the timegraph and the call stack areas).	SWTBot	Pass	
5.2	valid text life import	import a file fiboriacci.symbols	the call stack areas).	3441001	F a55	
6	Function name import - CDT					
6.1	Binary import	Click the "Configure" button in the view and click "Browse" to select the fibonacci executable (fibonacci).	The view now displays the function names for both traces	Manual	Pass	
6.2	Binary import Ittng 2.8+	Open an Ittng 2.8+ trace with the executable present	The view now displays the function names for the trace	Manual	Pass	

	Section	Pass	Fail	Automated	To Do	Comments

0	Prerequisites						
0.1	Import traces	Import LTTng Kernel traces in Tracing project		Manual	Pass		
		Create an experiment with LTTng Kernel					
0.2	Create experiment	traces		Manual	Pass		
1	View management						
1.1	Open perspective	Open and reset LTTng Kernel Perspective	Control Flow view opens.	SWTBot	Pass		
1.2	Open trace	Open Linux Kernel trace in Project Explorer	Control Flow view is populated with processes, sorted by Trace then TID. Child processes appear under their parent, sorted by birth time. Range is set to initial offset. Arrows are drawn between states of a CPU.	SWTBot	Pass		
1.2	Open experiment	Open experiment with Linux Kernel traces in Project Explorer	Control Flow view is populated with processes, sorted by Trace then TID. Child processes appear under their parent, sorted by birth time. Range is set to initial offset. Arrows are drawn between states of a CPU.	Manual	Pass		
1.3	Close view	Close the Control Flow view	View is closed.	SWTBot	Pass		
1.4	Open view	Open the Control Flow view	Control Flow view is opened and populated with processes.	SWTBot	Pass		
2	View selection						
2.1	Select process in table	Select a process in the table	Same process is highlighted in time graph.	SWTBot	Pass		
2.2	Select process in time graph	Select a process in the time graph (empty region)	Same process is highlighted in table. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass		
2.3	Select state in time graph	Select a state (A block in the gantt chart) in the time graph	Same process is highlighted in table. State is highlighted in time graph. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass		
3	Mouse handling						
•			Visible range is dragged. When mouse button				
3.1	Drag move chart area	Ctrl-Drag move time graph left and right with middle button	is released, states are updated and new time range is propagated to other views.	SWTBot	Pass		
3.2	Zoom time range (mouse wheel)	Zoom with mouse wheel up and down, cursor inside time graph while holding the Ctl button		SWTBot	Pass		
3.3	Zoom time range (mouse drag)	Drag in time graph scale left and right with left button	Time range is zoomed in and out. When mouse button is released, states are updated and new time range is propagated to other views.	SWTBot	Pass		
	Mouse vertical scroll	Scroll with mouse wheel up and down	Table and time graph scroll up and down and remain aligned. Selected process does not change. Vertical scroll bar updated.	Manual	Pass		

12/9/2024

3.5	Vertical scroll bar	Click and drag vertical scroll bar	Table and time graph scroll up and down and remain aligned. Selected process does not change.	Manual	Pass	
3.6	Drag zoom time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views.	SWTBot	Pass	
			Time range is reset to full range, states are updated and new time range is propagated to			
3.7	Double-click reset time range	Double-click left button on time scale	other views.	Manual	Pass	
3.8	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows process name only.	Manual	Pass	
3.9	Mouse hover (state)	Hover mouse in time graph over state	Tool tip shows process name, state name, date, start time, stop time, duration. For USERMODE state, CPU is shown. For SYSCALL state, CPU and System Call is shown. For INTERRUPTED state, CPU is shown.	Manual	Pass	
3.10	Drag mouse selection	Drag select time graph with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative).	SWTBot	Pass	
3.11	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	
		(5.12 5.115)	meganit,			
4	Keyboard handling					
4.1	Keyboard navigation in time graph (process selection)	With focus on time graph, use UP, DOWN, HOME, END keys	Selected process is changed. Table selection is updated. Vertical scroll bar updated.	Manual	Pass	
4.2	Keyboard navigation in time graph (state selection)	With focus on time graph, use LEFT, RIGHT keys	Previous or next state is selected. Selected time is updated in other views.	SWTBot	Pass	
		•				
5	Tool bar handling					
5.1	Show Legend	Click Show Legend button	The legend dialog is opened and can be closed.	SWTBot	Pass	
5.2	Reset Time Scale	Click Reset Time Scale button	Time range is reset to full range, states are updated and new time range is propagated to other views.	SWTBot	Pass	
5.3	Select Previous/Next Event	Click Previous/Next Event button	Previous or next state is selected. Selected time is updated in other views.	SWTBot	Pass	
5.4	Select Previous/Next Process	Click Previous/Next Process button	Selected process is changed in table and time graph. Vertical scroll bar updated.	Manual	Pass	
5.5	Zoom In/Out	Click Zoom In/Out button	Time range is zoomed in and out, relative to center of selection or window. States are updated and new time range is propagated to	Manual	Pass	
5.6	Filter Dialog	Open Filter Dialog	Verify that all buttons are working correctly	SWTBot	Pass	
	Filter Processes	Open Filter Dialog Deselect several processes	Verify that only selected processes are displayed in the view	SWTBot	Pass	
5.7		3) Press Ok	Verify that arrows are not drawn in the time			
5.8	Hide Arrows	Click Hide Arrows button	graph	Manual	Pass	

5.9	Follow CPU Forward	With focus on time graph, click Follow CPU Forward button	Time graph is updated to show the next state for this cpu following the arrow, the event is selected in the Events editor.	SWTBot	Pass	
F 10	Follow CPU Backward	With focus on time graph, click Follow CPU	Time graph is updated to show the previous state for this cpu following the arrow, the event is selected in the Events editor.	SWTBot	Pass	
5.10		Backward button				
5.11	Optimize	Click on the optimize button	verify that the processes are closer together.	SWTBot	Pass	
5.12	Re-Optimize	Click on the optimize button a few more times Select a thread and click on go to next event		SWTBot	Pass	
5.13	Go to next event of selected thread	of selected thread	thread is the same as the previous event	Manual	Pass	
5.14	Go to previous event of selected thread	Select a thread and click on go to previous event of selected thread	Verify in the events table that the selected thread is the same as the previous event	Manual	Pass	
6	Synchronization					
			Selected time line is updated. If selected time is outside current range, time range is updated to include it and view doesn't zoom			
6.1	Time synchronization	Select a random time in another view	out	Manual	Pass	
6.2	Event synchronization	Select a state-impacting event (sched_switch, syscall,) in events table or in Resources view using Select Previous/Next event.	In addition to updating the selected time, the process containing the state change is selected and revealed. Vertical scroll bar is updated if necessary.	Manual	Pass	
	•	Select a new window range in Resources				
6.3	Window range synchronization	view or in Histogram view.	Window range is updated.	Manual	Pass	
6.4	Selection range synchronization	In any other view that supports selection range synchronization, select a new range.	Selection is highlighted. If the left time (T1) of selected time range is outside the current range, then window range is updated to include it	Manual	Pass	
-						
7	Multiple Trace Synchronization					
	Preparation	Download traces.zip (if necessary) and unzip into a local directory \${local} Import kernel trace \${local} traces/import/kernel-overlap-testing Import UST \${local}/traces/import/trace ust-overlap-testing		Manual	Pass	
7.1	Open multiple traces (no everlan)	Open multiple traces that don't overlap in time. For each trace, right click on the Events table and select Follow time update from other traces	View shows the last opened trace	Manual		
7.1	Open multiple traces (no overlap)	UHIEL HALES	view allowa life idal obelieu lidue			
			·	Mariuai	Pass	
7.2	Change selected time and range (no overlap)	Select a time and new range	Selected time line and time range is updated to selected time and new range.	Manual	Pass	
7.2			Selected time line and time range is updated			
	(no overlap)	Select a time and new range Select different trace by clicking its Events	Selected time line and time range is updated to selected time and new range. View is updated to show selected trace. Selected time line and time range are restored to the selected trace's previously selected time and range.	Manual	Pass	
7.3	(no overlap) Select other trace (no overlap) Open multiple traces (overlap) Change selected time and range	Select a time and new range Select different trace by clicking its Events editor tab Open multiple traces that record events in the same time range. For each trace, right click on the Events table and select Follow time update from other traces	Selected time line and time range is updated to selected time and new range. View is updated to show selected trace. Selected time line and time range are restored to the selected trace's previously selected time and range.	Manual Manual	Pass	
7.3	(no overlap) Select other trace (no overlap) Open multiple traces (overlap)	Select a time and new range Select different trace by clicking its Events editor tab Open multiple traces that record events in the same time range. For each trace, right click on the Events table and select Follow time	Selected time line and time range is updated to selected time and new range. View is updated to show selected trace. Selected time line and time range are restored to the selected trace's previously selected time and range. View shows the last opened trace Selected time line and time range is updated	Manual Manual	Pass Pass	

8.1	Filtering						
	Preparation	Open 2 LTTng Kernel Traces		Manual	Pass		
8.1	Apply filter (1st trace)	Open filter dialog Create filter Click on OK	Make sure that only selected processes of filter dialog are shown	SWTBot	Pass		
8.2	Apply filter (2nd trace)	Switch to 2nd trace (keep 1st open) Open filter dialog Create filter Click on OK	Make sure that only selected processes of filter dialog are shown	Manual	Pass		
8.3	Persitent filter	Switch between both open traces	Make sure that previously set filter are still available	Manual	Pass		
9	Miscellaneous						
9.1	Restart (Bug 409345)	Open LTTng Kernel Trace Select Control Flow View Restart Eclipse	Verify that Control Flow View is populated	Manual	Pass		
9.2	Select single time (Bug 477009)	1) Open LTTng UST trace while CFV is open 2) Select event in events table		Manual	Pass	au	automation
9.3	Window range synchronization (Bug 477012)	1) Open Control Flow view, Resources view and a kernel trace. Initial window range is 'range 1'. 2) Go "right one page" on Control Flow view by pressing right arrow in scroll bar. 3) Go "left one page" on Resources view by pressing left arrow in scroll bar. 4) Go "right one page" on Control Flow view.	Verify that after each step the initial window range doesn't change	Manual	Pass

1.5	Check analysis for another trace type	In the project explorer, expand a non- LTTng Kernel trace	"Input/Output" analysis is not present	SWTBot	Pass	
2	View Management					
2.1	Populate analysis's view	Open an LTTng kernel trace and expand the "Input/Output" analysis in the project explorer	"Disk I/O Activity" View appears under the analysis	SWTBot	Pass	

2.2	Open view Close trace	Double-click the Disk I/O Activity View under the Input/Output analysis Close the trace With the view	analysis. After the analysis, the xy charts is populated. The Disk I/O Activity view is emptied. The Disk I/O	SWTBot Manual	Pass Pass	
2.4	Open trace	already opened, open the trace	Activity view is populated.	Manual	Pass	
2.4	open trace	Close the Disk	The view is	Mariaai	1 433	
2.5	Close view	I/O Activity view	closed.	Manual	Pass	
2.6	Re-open view	Double-click the Disk I/O Activity view under the Input/Output analysis in project explorer.	The view opens and is automatically	Manual	Pass	
3	View selection					
4	Mouse handling		Time a ways are in			
4.1	Drag move time range	Drag move xy chart left and right with middle button	Time range is dragged. When mouse button is released, series are updated and new time range is propagated to other views.	Manual	Pass	

4.2	Zoom time range (mouse wheel)	Zoom with mouse wheel up and down, cursor inside xy chart	new time range is propagated to other views.	SWTBot	Pass	
4.3	Drag zoom time range	Drag select time	Selection highlighted. When mouse button is released, time range is zoomed to selection, series are updated and new time range is propagated to other views.	Manual	Pass	
4.4	Mouse hover	Hover mouse in xy chart region anywhere	Tool tip shows the puntual disk activity, with units in <unit>/s</unit>	Manual	Pass	
4.5	Drag mouse selection	Drag select xy chart with left button	Selection highlighted and selection range is propagated to other views	Manual	Pass	
4.6	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted and	Manual	Pass	

4.70	Drag mouse selection (Status bar)	Drag select xy chart with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative) Selection	Manual	Pass	
4.8	Shift key selection (Status bar)	Click select with left button (begin time), press shift key and click select another time (end time)	highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second	Manual	Pass	
5	Keyboard handling

tep	Test Case	Action	Verification	Type		Comment	
	Prerequisites						
0.1	Import traces	any trace since we use stub for the result		Manual	To Do		
0.2	Download analysis stubs	https://bugs.eclipse.org/bugs/attachment.cgi?id=263946	-from bug: https://bugs.eclipse.org/bugs/show_bug.cgi?id=493941	Manual	To Do		
	Dominous unaryolo otabo	intperiodige.compositorigiodigional and interiodicinal and interiodici	The stage compositor of the stage of the sta				
	Custom external						
	analysis						
		Create the following analyses (\$name, \$command): analysisEmpty, analysisEmpty analysisMultipleRow, analysisMultipleRow analysisMultipleRow), analysisMultipleSimilarRow analysisMultipleSimilarRow, analysisMultipleSimilarRow analysisOneRow multipleReports, multipleReports invalidAnalysis, invalidAnalysis errorResult, errorResult clone, analysisOneRow Right click on "External Analyses" node Click the "add" action Insert "falighth/Sexecutable" which is the full path to the stub executable.	All new external analysis are present under the "External Analysis" node in the Project explorer view. All new elements do NOT have the strikethrough text style applied EXCEPT for the tuple (invalidAnalysis, invalidAnalysis)				
		ex: "/tmp/stub/stubAnalysis" where stubAnalysis is the stub executable		Manual	To Do		
	Add all stubs analysis	The path does NOT support ~ or relative path		Manual		Kyrollos: I had to open the trace to be able to see the external analysis	
1.2	Actions available	Right click on a non-strikethrough custom analysis.	The run action can be clicked and in enabled text mode.	Manual	To Do		
	Actions unavailable	Right click on a strikethrough custom analysis.	The run action CANNOT be clicked and is in disabled text mode.	Manual	To Do	https://bugs.eclipse.org/bugs/show_bug.cgi?id=498218	Kyrollos: if the
1.3	Delete analysis	Right click on the tuple (clone, invalidAnalysis) Select the delete action for the node	The analysis does not appear in the list anymore. analysisEmpty should return a message to the user regarding the emptiness of the report. errorResult should return an error message to the user and display the result of the command.	Manual	То Do	https://bugs.eclipse.org/bugs/show_bug.cgi?id=543800	close the oper trace and reop to see that the external analy that was delet not in the exte analysis list
1.4	Run analysis	Launch remaining analysis via righ-click and run action	All other one have result and should result in a new table and new report node under the report node.	Manual	To Do	launching an analysis on a closed trace doesn't do anything	
2	Reports						
			The "Reports" node under the Project Explorer should contain 4 reports: analysisMultipleRow Report analysisMultipleSimilarRow Report analysisOneRow Report				
2.1	Reports node	Expand the "Reports" node under the Project Explorer	multipleReports	Manual	To Do	"multipleReports" is displayed "multipleReports Report" in Report	
			An additional node should be present under the "Reports" node: analysisOneRow Report #2				
.2	Same name report	Execute the "analysisOneRow" analysis again.	Note: This behaviour is subject to change in the following year but still an action will be taken on same name report creation.	Manual	To Do		
	ounc name report	Right click on the duplicate "analysis OneRow" node and click on the					
2.3	Delete node	delete action	The report node is not present anymore	Manual	To Do		
	Open a report	Right click on any report and select the "open" action	A new panel should open with the result table of the analysis	Manual	To Do		
	Open the same report again	Right click again on the same report to open it	A new panel should open with the result table of the analysis	Manual	To Do		
2.6	Multiple report	Open the "multipleReports" report.	Validate that a user is able to navigate between sub tab of a report	Manual	To Do		
_							
	Result Table						
	Prerequisites	Open the "analysisMultipleRowReport"		Manual	To Do		
	Hide table	Click the "Toggle" button in the right corner of the result table	The result table is hidden	Manual	To Do		
3.3	Show table	Click the "Toggle" button in the right corner of the result table	The result table is shown	Manual	To Do	Waker and Wakee process name sorting is confusing: "Xorg" is sorted	
3.4	Sorting	Sort all column by clicking on the column name. Clicking multiple time on the name should change the ordering sorter.	Validate that the order make sense	Manual	To Do	lower than "compiz", which is sorted lower than "cou_sched". Kyrollos: Not sure about the Wakee process name sorting	
3.5	Colum Resizing	Resize the column	Validate that the resize works	Manual	To Do	· · · · · · · · · · · · · · · · · · ·	
		Select multiple rows by holding ctrl and clicking on multiple unselected					
	Multiple selection	rows of the table	Multiple selections are highlighted in the table	Manual	To Do	Command key on macOS.	
3.6		Deselect multiple rows by holding ctrl and clicking on multiple selected					

10.2.0-TraceCompassTestCases

		Use the menu on the upper right of the result table and select "create ba	r				
4.1	Create	chart"	Note: a bar chart does NOT perform agregation of categories values	Manual	To Do		
4.2	Series dialog add	Select any x and any y click add	Series are added to the series list	Manual	To Do		
4.3	Series dialog remove	Remove all newly created series via the delete button	User should be able to delete series	Manual	To Do		
4.4	Creat chart	Select any x and y and click add and "ok"	A bar chart should be created Note: a bar chart does NOT perform agregation of categories values	Manual	To Do	I selected Wakee Process TID as X axis, but TID is not displayed well because of the sheer number of TIDs. Kyrollos: Even when the chart is exported the TIDs aren't visible	
4.5	Selection	Click on any bar inside the chart	The corresponding row should be selected in the table and the chart should highlight the selected bar	Manual	To Do	When there are too much bars inside the chart it is more difficult to click on a bar.	
4.6	Multi selection	Ctrl+click on other unselected bar	Selections should be highlighted in the result table and the chart	Manual	To Do		
47	Deselection	Ctrl+click on other selected har	The clicked bar should be removed from selection and the result table update with the current selections	Manual	To Do	https://bugs.eclipse.org/bugs/show_bug.cgi?id=579392	Kyrollos: Sometimes it is difficult to select an entry from the bar chart specially when you have lots of bars but I can deselect the bars and it worked on I inux
4.8	Y axis	Recreate the same graph but with the y log scale option enabled	Y axis should be in log scale mode Note: check for zero value and negative handling since log scale does not support zero and negative	Manual	To Do	When checking logarithmic scale Y, all y that do not support logarithmic scale Y are not removed. When a Y is selected, all y that do not support logarithmic scale Y are enrowed. Marco for 7.3: don't know where to find negative or null value samples. Kyrollos: I can't test with y negative values I don't know where to find possible samples for such case	LIIOA
4.9	Keep the chart open	Keep the chart open	, , , , , , , , , , , , , , , , , , ,	Manual	To Do	And? (Run the next step I presume; refactor?) Kyrollos: What is the expected result? The chart is still open and can create another custom views next to the chart?	
4.10	Hide the table results	Hide the table results		Manual	To Do	Expecting what? (Toggling so the chart keeps showing I presume.) Kyrollos: When toogle button is clicked the table is hidden and when it is ckicked again the table appears and the chart is resized. I presume that it is the expected output. To be confirmed	
5	Scatter Chart						
5.1	Create	Use the menu on the upper right of the result table and select "create scatter chart"		Manual	To Do		
5.2	Creat chart	Select any x and y and click add and "ok"	A scatter chart should be created	Manual	To Do		
5.2	Selection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart	Manual	To Do		
5.4	Multi selection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart Should be the same behaviour as the bar chart	Manual	To Do	Kyrollos: When entries are selected from scatter chart, the selected entries are selected in the table but when I toogle to hide the table and show it again, the selected entries are no more selected in thetable	i
5.5	Deselection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart	Manual	To Do	https://bugs.eclipse.org/bugs/show_bug.cgi?id=579392	
				Manual	To Do	https://bugs.eciipse.org/bugs/sirow_bug.cgl?id=579392	
5.6	Mouse hovering	Hover mouse in the graph	On mouse hovering a cross should snap to the nearest point		To Do		
5.7	Full deselection	Click in the chart when no hovering cross is present	All selected objects should be deselected	Manual	סט טו
